The view only opens the memory address and the variable's content on the available window and will not open them on other view. Moving the reference line to the opposite direction You can move the reference line in the same direction than the data lines by clicking on the line. Then simply click on the arrow until it is shifted to the other direction. Moving the rows from the panel to a new panel You can move rows from a panel to a new one by clicking and dragging it. Resizing the panel You can resize the panels in the panel bar. To do that, you need to select and resize the panel you want. Restoring the panels When your panels have been collapsed, you can restore them by clicking on the second button from the left. Then, you can modify the layout of the panel as you want. Full panel You can restore the original layout of your panel by clicking on the second button from the left. You can also zoom in the selected panel. Subpanels You can restore the subpanels you have collapsed by clicking on the button from the right and then on the second button from the left. Move the subpanels of the collapsed panel to another panel You can drag and drop the subpanels of the collapsed panel to another panel. Find and replace text You can replace text in

your panel by clicking on the button from the right and then on the button with the arrow. Then, you will be able to search for the text you want to replace and to replace it with the text you want. Global search You can replace text by the whole content of the file or by any part of the content with the global search. Updating the panel If you have edited your text you will be asked to update your panel. Update the panel with the text added If you have added new text, you will be asked to update your panel. Cleaning the panel If you have modified the text you have typed, or you have cleared the panel, you will be asked to clean your panel. Duplicate text You can duplicate the text you have typed in the panel. Adding images You can add images to your panel. Just click on the button from the right and then on the image. Adding links You can add links to the text 82157476af
